

**Town Hall Meeting
August 17, 2019**

Wilmington Adult Medicine *is changing!*

What should you do next?

Due to limited enrollment, please don't delay. Schedule your appointment with Dr. Liederbach's wife Linda, Practice Manager at the Wilmington Adult Medicine office to discuss which Membership tier is a good fit for you. Our desire is for this to be informative and see if this is right for you, not a high pressure sales meeting.

Wilmington Adult Medicine is changing to a direct primary care practice model. Ultimately, that means Dr. Liederbach gets to spend more time with you, whenever you need it, without having to jump through the hoops of a traditional medical practice. We love it, our current membership patients love it, and we think you will too.

Fewer Patients = More Time for You

We are only accepting a total of 300 patients at Wilmington Adult Medicine. Compare that to a typical "traditional insurance based" practice which can have upward of 4,000 patients. Because we limit the number of patients we see, that opens up our schedule to be available when you need us – no matter what time of the day, or part of the week.

Insurance-Free = Hassle-Free

We don't accept insurance. But don't let that scare you, because most of our patients actually save money as Wilmington Adult Medicine Direct Primary Care members. For healthcare expenses outside our office, we can help you find the combination of healthcare, and health insurance that saves you money when combined with our direct care model. We plan to have a licensed health insurance expert at the August 17th Town Hall Meeting to help you. ■
